Viet Nam Secondary Education Sector Assessment, Strategy, and Road Map Asian Development Bank,2020-02-01

This report provides an assessment of Viet Nam's secondary education sector including technical and vocational education training programs. The report reviews sector achievements and challenges as well as the Government of Viet Nam's strategy and policies. It also outlines how the Asian Development Bank (ADB) and other development partners have contributed to the sector. The report provides recommendations on measures to boost access to secondary education and to improve its overall quality and management.

Optimizing K-12 Education through Online and Blended Learning Ostashewski, Nathaniel, Howell, Jennifer, Cleveland-Innes, Martha, 2016-07-13. The integration of information and communication technologies in education is unavoidable as an increasing percentage of educators embrace modern technology; others are faced with the decision to reevaluate their own pedagogical practices or become obsolete. To meet the needs of students, one must first define what stipulates a successful K-12 student: the best practices of online classrooms, the warning signs for low performing students, and how to engage web-based students. *Optimizing K-12 Education through Online and Blended Learning* addresses the models, support cases, and delivery of K-12 online education. Seeking to further the conversation about the most effective ways to integrate ICT into the classroom, this publication presents theoretical frameworks to support educators and administrators. This book is an essential collection of research for teachers, administrators, students of education, IT professionals, developers, and policy makers.

Online Course Management: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2018-03-02. The rapid growth in online and virtual learning opportunities has created culturally diverse classes and corporate training sessions. Instruction for these learning opportunities must adjust to meet participant needs. *Online Course Management: Concepts, Methodologies, Tools, and Applications* is a comprehensive reference source for the latest scholarly material on the trends, techniques, and management of online and distance learning environments and examines the benefits and challenges of these developments. Highlighting a range of pertinent topics such as blended learning, social presence, and educational online games, this multi-volume book is ideally designed for administrators, developers, instructors, staff, technical support, and students actively involved in teaching in online learning environments.

South African Schooling: The Enigma of Inequality Nic Spaull, Jonathan D. Jansen, 2019-11-05. This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development, and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored, and if so, what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources, and learning outcomes? While decidedly local, these questions resonate throughout the developing world.

South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI **Neuroscience, Learning and Educational Psychology** María Jesús Luque Rojas,Eduardo Blanco Calvo,María Teresa Martín-Aragoneses,2022-08-25
