Writing in APA Style 7th Edition Example Paper

Level 1 heading
(see p. 2)

Writing in the style of the American Psychological Association (APA) is a regular practice for students of higher degree programs in psychology and many programs in science. The new edition of the manual has made several changes, such as endorsing the use of the singular *they*, as exemplified in the next sentence. Each student writer who applies the new APA student writing standards may encounter different challenges, however, they may use the resources provided by the AUSB Writing Center for support in learning the relevant new rules.

Using singular
“they”

According to the seventh edition of the *Publication Manual of the American Psychological Association* (2019), the style's broad applicability "helps authors present their ideas in a clear, concise, and organized manner" that "uniformity and consistency enables readers to (a) focus on the ideas being presented rather than formatting and (b) scan works quickly for key points" (p. xvii). Since this paper is mostly written in the seventh edition of APA style, attentive readers will note that it has many examples of changes from the sixth edition. Most of the rules demonstrated here are those a student will need to have some acquaintance with in order to write easily according to the student writing guidelines, which are distinct from APA's new journal article reporting standards (Pax *et al.*, 2013).

The Structure of a Paper in APA Style

New in APA 7:
Use “*et al.*” for three
or more authors

The APA style guidelines are designed for primary research papers that usually contain the following sections: (a) introduction, (b) method, (c) results, (d) discussion, and (e) references. However, the actual headings may vary depending on the type of paper one is writing (American Psychological Association, 2019). For example, papers that do not describe primary research or original experimental data may omit the method, results, and discussion
