**Minds on Trial** Charles Patrick Ewing, Joseph T. McCann, 2006-03-16 In recent years the public has become increasingly fascinated with the criminal mind. Television series centered on courtroom trials, criminal investigations, and forensic psychology are more popular than ever. More and more people are interested in the American system of justice and the individuals who experience it firsthand. *Minds on Trial Great Cases in Law and Psychology* gives you an inside view of 20 of the highest profile legal cases of the last 50 years. Drs Ewing and McCann take you behind the scenes of each of these cases, some involving celebrities like Woody Allen, Mike Tyson, and Patty Hearst, and explain the impact they had on the fields of psychology and the law. Many of the cases in this book, whether involving a celebrity client or an ordinary person in an extraordinary circumstance, were determined in part by the expert testimony of a psychologist or other mental health professional. Psychology has always played a vital role in so many aspects of the American legal system, and these fascinating trials offer insight into many intriguing psychological issues. In addition to expert testimony, some of the issues discussed in this entertaining and educational book include the insanity defense, brainwashing, criminal profiling, capital punishment, child custody, juvenile delinquency, and false confessions. In *Minds on Trial*, the authors skillfully convey the psychological and legal drama of each case while providing important and fresh professional insights. Mental health and legal professionals as well as others with an interest in psychology and the law will have a hard time putting this scholarly yet readable book down.

*Confirmation Bias in Criminal Cases* Moa Lidén, 2023-04-15 In criminal cases, practitioners such as police officers, crime scene investigators, pathologists, prosecutors, and judges are expected to make decisions that are objective and impartial. However, research since the 1960s into so-called confirmation bias provides persuasive scientific evidence that humans are unable to do so. As flawed investigations and proceedings come to light, the importance of undertaking proper bias mitigation measures is clear. *Confirmation Bias in Criminal Cases* takes a multi-disciplinary approach to a complex real-world issue. It lays out the chronology of criminal investigations and proceedings and assesses how bias plays a role in each stage. It also offers research-based strategies to combat bias, such as independent review, contextual information management, linear sequential unmasking, and structured evaluations of the evidence. This

book is vital reading for anyone involved in the criminal justice system It not only gives a holistic view of the human element of confirmation bias but it also offers strategies for how to address it    **Analyzing Criminal Minds** Don Jacobs,2011-04-19

Hundreds of thousands of the inmates who populate the nation s jails and prison systems today are identified as mentally ill Many experts point to the deinstitutionalization of mental hospitals in the 1960s which led to more patients living on their own as the reason for this high rate of incarceration But this explanation does not justify why our society has chosen to treat these people with punitive measures In Crime Punishment and Mental Illness Patricia E Erickson and Steven K Erickson explore how societal beliefs about free will and moral responsibility have shaped current policies and they identify the differences among the goals ethos and actions of the legal and health care systems Drawing on high profile cases the authors provide a critical analysis of topics including legal standards for competency insanity versus mental illness sex offenders psychologically disturbed juveniles the injury and death rates of mentally ill prisoners due to the inappropriate use of force the high level of suicide and the release of mentally ill individuals from jails and prisons who have received little or no treatment
