A. How does the mean speed of the water molecules change as they are heated?

The water gets hotter (has more heat energy).

B. Does the mean molecular speed change as much as the temperature as the water heats up? Explain.

Yes, the more the temperature increases the more the molecules of the water speed up (until they hit the boiling point, where they cannot get hotter any longer.)

3. **Explain:** How is temperature related to the motions of molecules?

The higher the temperature, the faster the molecules move.

4. **Observe:** Click **Reset**. Set the **Water temperature** to 20 °C and the **Ice volume** to 50 cm<sup>3</sup>. Set **Add/remove heat energy** to 0 J/s. Click **Play**. How do the molecules in the liquid interact with the molecules in the solid?

Lovett, 2015-04-10 Paul K Lovett's science fiction satire The Evolution of Robert Carr is an audacious operatic romp through a dystopian near future where genetic enhancements have pushed the divide between rich and poor ever closer to its social breaking point The subversive tale opens on Robert Carr's eighteenth birthday when he is about to join the top 2%% of the population by becoming a recipient of an exorbitantly expensive neural enhancement procedure Yet Robert is rather uniquely reticent to the prospect He fears becoming distant cold inhuman like his enhanced best friend And that his girlfriend one of the revolutionary Dragoons will spurn him Lovett has crafted a sci fi novel with sharp social commentary that cleverly examines such issues as the staggering income gap the emerging role of technology and the place of religion in a tech driven world Kirkus Reviews *Dark Future*
