1. The golf ball below has reached the top of its trajectory in the time shown. What will the total hang time be when the ball hits the ground? Assume no air resistance or spin.

- A. 6.15 seconds
- B. 8.20 seconds
- C. 12.30 seconds
- D. 16.40 seconds

**Correct Answer: B. 8.20 seconds**

**Explanation:** Assuming no spin, the flight of a golf ball is symmetrical; it takes the same amount of time to go up as it takes to come down. Since it took 4.10 seconds to rise to the top of its trajectory, it will take another 4.10 seconds to descend, for a total hang time of 8.20 seconds.

*Distance Learning for Elementary STEM* Amanda Thomas (Math professor), 2020 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes. Online and distance learning may sound fairly straightforward. Instead of learning in a classroom setting, students learn at home with the assistance of online resources. But classroom learning does not always translate easily to online settings, particularly at the elementary level where children should be actively engaging in activities, exploration and discussion. For STEM subjects, integration across subjects, settings and play based versus traditional learning present opportunities for young learners to engage in age appropriate online and distance learning. This book features eight creative integrated STEM lessons including ideas for designing a zoo, learning to garden, exploring the night sky and more. Each lesson offers online, traditional and hands on components with connections to the ISTE Standards and STEM standards across elementary grades. Concluding with a model for designing online and distance STEM learning for elementary aged children, this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students.
