## Glenn N Saxe Book:

**The Body Keeps the Score** Bessel A. Van der Kolk, 2015-09-08 Originally published by Viking Penguin 2014 *The Psychobiology of Trauma and Resilience Across the Lifespan* Douglas L. Delahanty, 2008-09-05 Research has suggested that childhood experiences confer risk resilience for reactions to trauma in adulthood and predictors and correlates of posttraumatic stress disorder PTSD appear to differ developmentally Research in PTSD has typically been conducted by either child or adult researchers with relatively little overlap or communication between the two camps Developmental models of PTSD are necessary to fully understand the complex constellation of responses to trauma across the lifespan Such models can inform study designs and lead to novel developmentally appropriate interventions To this end this book is organized in such a way as to present and integrate research into child adult and older adult trauma samples in an attempt to culminate in a testable model of PTSD risk and resilience across the lifespan Each author incorporates a developmental slant to their individual chapter and the chapters are organized to highlight potential differences in our understanding of risk and resiliency between children and adults Initial chapters concerning pre and peri traumatic risk factors for PTSD lead into chapters reviewing specific risk and resilience factors in adults and children Additional chapters focus on the impact of childhood trauma on adult functioning and the biology of PTSD in children adults and older adults As PTSD rarely occurs in a pure form specific chapters focus on the impact of comorbid disorders in our understanding of PTSD and the final chapters consider both psychosocial and pharmacological treatments for PTSD in children and adults Children of the Camp Catherine-Lune Grayson, 2017-10-01 Chronic violence has characterized Somalia for over two decades forcing nearly two million people to flee A significant number have settled in camps in neighboring countries where children were born and raised Based on in depth fieldwork this book explores the experience of Somalis who grew up in Kakuma refugee camp in Kenya and are now young adults This original study carefully considers how young people perceive their living environment and how growing up in exile structures their view of the past and their country of origin and the future and its possibilities *Humanitarianism and Mass Migration* Marcelo Suarez-Orozco, 2019-01-08 The world is witnessing a rapid rise in the number of victims of human trafficking and of migrants voluntary and involuntary internal and international authorized and unauthorized In the first two decades of this century alone more than 65 million people have been forced to escape home into the unknown The slow motion disintegration of failing states with feeble institutions war and terror demographic imbalances unchecked climate change and cataclysmic environmental disruptions have contributed to the catastrophic migrations that are placing millions of human beings at grave risk Humanitarianism and Mass Migration fills a scholarly gap by examining the uncharted contours of mass migration Exceptionally curated it contains contributions from Jacqueline Bhabha Richard Mollica Irina Bokova Pedro Noguera Hirokazu Yoshikawa James A Banks Mary Waters and many others The volume s interdisciplinary and comparative approach showcases new research that reveals how current structures of health mental

health and education are anachronistic and out of touch with the new cartographies of mass migrations Envisioning a hopeful and realistic future this book provides clear and concrete recommendations for what must be done to mine the inherent agency cultural resources resilience and capacity for self healing that will help forcefully displaced populations
