

A large crowd of people is gathered for a protest. In the background, several large Japanese banners are visible, including one with the characters '反原発' (Anti-Nuclear Power) in black on a yellow background, and others in green and pink with Japanese text. In the foreground, two prominent yellow hand-shaped signs are held up, both with the text 'NO NUKES!' in red. One hand sign also has a green banner with Japanese text 'ストップ再稼働' (Stop Restart) attached to it. The crowd is dense, and many people are wearing hats and holding smaller signs or umbrellas.

Energy Justice Raya Salter, Carmen G. Gonzalez, Elizabeth Ann Kronk Warner, 2018-11-30 *Energy Justice US and International Perspectives* is a pioneering analysis of energy law and policy through the framework of energy justice While climate change has triggered unprecedented investment in renewable energy the concept of energy justice and its practical application to energy law and policy remain under theorized This volume breaks new ground by examining a range of energy justice regulatory challenges from the perspective of international law US law and foreign domestic law The book illuminates the theory of energy justice while emphasizing practical solutions that hasten the transition from fossil fuels and address the inequities that plague energy systems

Zillman, Milton Fernando Montoya, José Juan González, 2020-05-21 Energy justice has emerged over the last decade as a matter of vital concern in energy law which can be seen in the attention directed to energy poverty and the United Nations Sustainable Development Goals There are energy justice concerns in areas of law as diverse as human rights consumer protection international law and trade and in many forms of regional and national energy law and regulation This edited collection explores in detail at four kinds of energy justice The first distributive justice relates to the equitable distribution of the benefits and burdens of energy activities which is challenged by the existence of people suffering from energy poverty Secondly procedural or participation justice consists of the right of all communities to participate in decision making regarding energy projects and policies that affect them This dimension of energy justice often includes procedural rights to information and access to courts Under the concept of reparation or restorative justice the book looks at even handed enforcement of energy statutes and regulations as well as access to remedies when legal rights are violated Finally the collection addresses social justice with the recognition that energy injustice cannot be separated from other social ills such as poverty and subordination based on race gender or indigeneity These issues feed into a wider conversation about how we achieve a just energy transition as the world confronts the urgent challenges of climate change **Renewable Energy and International Law** Chitzi C. Ogbumgbada, 2025-11-27 This book addresses the injustices associated with renewable energy development and use within the context of the energy transition Primarily informed by a communitarian approach to energy justice the book draws on the philosophical concept of African communitarianism as a guiding principle This concept emphasises harmonious or communal relationships among members of a political and social community making it easier to justify solutions to renewable energy injustices in contrast to an individualistic approach The book argues that

international law can facilitate this approach to energy justice by adapting existing norms standards practices and institutions Adopting the unfair distribution of renewable energy benefits in the international community as a test case the book contributes to existing energy justice scholarship by highlighting the significant contribution of non Western philosophies in addressing renewable energy injustices It also repositions international law as a tool for operationalising this approach to energy justice The book will be of interest to researchers policymakers international governmental organisations and civil society Michigan Law Review ,2018 **Global Energy Justice** Lakshman D. Guruswamy,2016 Softbound New softbound print book *Energy Security, Equality and Justice* Benjamin K. Sovacool,Roman V. Sidortsov,Benjamin R. Jones,2013-12-04 This book applies concepts from ethics justice and political philosophy to five sets of contemporary energy problems cutting across time economics politics geography and technology In doing so the authors derive two key energy justice principles from modern theories of distributive justice procedural justice and cosmopolitan justice The prohibitive principle states that energy systems must be designed and constructed in such a way that they do not unduly interfere with the ability of people to acquire those basic goods to which they are justly entitled The affirmative principle states that if any of the basic goods to which people are justly entitled can only be secured by means of energy services then in that case there is also a derivative entitlement to the energy services In laying out and employing these principles the book details a long list of current energy injustices ranging from human rights abuses and energy related civil conflict to energy poverty and pervasive and growing negative externalities The book illustrates the significance of energy justice by combining the most up to date data on global energy security and climate change including case studies and examples from the electricity supply transport and heating and cooking sectors with appraisals based on centuries of thought about the meaning of justice in social decisions Global Criminology and Criminal Justice Nick Larsen,Russell Smandych,2007-12 Global Criminology and Criminal Justice brings together 22 articles that constitute some of the most important recent literature in the field

Energy Justice Darren McCauley,2017-08-21 This book re conceptualizes energy justice as a unifying agenda for scholars and practitioners working on the issues faced in the trilemma of energy security poverty and climate change McCauley argues that justice should be central to the rebalancing of the global energy system and also provides an assessment of the key injustices in our global energy systems of production and consumption Energy Justice develops a new innovative analytical framework underpinned by principles of justice designed for investigating unfairness and inequalities in energy availability accessibility and sustainability It applies this framework to fossil fuel and alternative low carbon energy systems with reference to multiple case studies throughout the world McCauley also presents an energy justice roadmap that inspires new solutions to the energy trilemma This includes how we redistribute the benefits and burdens of energy developments how to engage the new energy prosumer and how to recognise the unrepresented This book will appeal to academics and students interested in issues of security and justice within global energy decision making **Energy Justice Across Borders** Gunter

Bombaerts, Kirsten Jenkins, Yekeen A. Sanusi, Wang Guoyu, 2019-10-18 This book is open access under a CC BY 4.0 license. We must find new and innovative ways of conceptualizing transboundary energy issues of embedding concerns of ethics or justice into energy policy and of operationalizing response to them. This book stems from the emergent gap, the need for comparative approaches to energy justice and for those that consider ethical traditions that go beyond the classical Western approach. This edited volume unites the fields of energy justice and comparative philosophy to provide an overarching global perspective and approach to applying energy ethics. We contribute to this purpose in four sections: setting the scene, practice applying theory to practice, and theoretical approaches. Through the chapters featured in the volume, we position the book as one that contributes to energy justice scholarship across borders of nations, borders of ways of thinking, and borders of disciplines. The outcome will be of interest to undergraduate and graduate students studying energy justice, ethics, and environment, as well as energy scholars, policy makers, and energy analysts.
