**of Reduced English** Massimo Laganà, 2023-12-15 This book illustrates the objectives and assumptions as well as the construction techniques and the structure of some of the most interesting forms of reduced English including Basic English Special English Plain English Simplified English Easy English Specialized English Nuclear English Globish and Basic Global English Although they have different cultural approaches and are aimed at communication purposes which are not always homogeneous and are sometimes divergent all the studies underpinning these projects share a common goal bearing in mind

the globalization processes of the contemporary world their primary aim is to use English as a starting point from which to build a language tool to be employed as a lingua franca for effective and adequate international communication in economic scientific and cultural fields The book is primarily intended for students and scholars interested in the various attempts that have been made to simplify the English language in order to make it universally available for a simple effective and global communication

**Deterritorializing Language, Teaching, Learning, and Research**, 2019-12-16

It is now recognized that language teachers and learners are both users and creators of knowledge in socially culturally politically materially complex and unpredictable environments With this in mind an increasing number of researchers in Second Language Education have progressively broken away from traditional ways of studying educational practices to find novel and more complex ways to conceptualize and study language teachers and learners teaching and learning practices and knowledge development This book is in line with these trends and should be considered as the actualization of experimentations with novel ways to apprehend the interrelationships between language and education by drawing on the conceptual repertoire of French philosopher Gilles Deleuze and his collaborator Félix Guattari To guide us through this reflexive journey ten scholars specialized in the field of Second Language Education call on their experiences as language educators and researchers to explore the intersections between language teaching learning and research focusing on the experiences of diverse populations e.g. students immigrants teachers etc in multiple settings e.g. Canada Japan United Kingdom universities and family literacy intervention programs Through this book new insights and lines of thought are generated on how research and educative practices can be transformed to reimagine second language teaching learning and research to think differently about the experiences of language teachers learners and researchers and disrupt the processes that may prevent us from innovating and seizing future opportunities Contributors are Francis Bangou Maria Bastien Valenca Joff P N Bradley Martina Emke Douglas Fleming Roumiana Ilieva Brian Morgan Enrica Piccardo Aisha Ravindran Gene Vasilopoulos and Monica Waterhouse
