Generation is an approach that solves this class of problems. The model first retrieves the most relevant pieces of information from your knowledge stores search index vector database or a set of documents and then generates its answer using the user's prompt and the retrieved material as context. This avoids hallucination and lets you decide what it says. *About the Book* A Simple Guide to Retrieval Augmented Generation is a plain English guide to RAG. The book is easy to follow and packed with realistic Python code examples. It takes you concept by concept from your first steps with RAG to advanced approaches exploring how tools like LangChain and Python libraries make RAG easy.
