Renaming in the tens

- Write the expression $73 + 82$.
- Ask students to determine whether the answer will be more than 100 before adding. They should be able to look at the tens and realize that adding tens will result in more than 10 tens.
- Rewrite it vertically and show the two numbers with place-value discs.
- Ask students to add the ones and where they should write the answer (under the line, in the ones place).
- Ask students to add the tens.
- Discuss and emphasize the following:
7 tens + 8 tens. The answer is not 15, it is 15 tens. We can split 15 tens into 10 tens and 5 tens. Since 10 tens is 1 hundred, 15 tens is also 1 hundred 5 tens.
- With the discs, replace the 15 tens with 1 hundred and 5 tens.
We rename 15 tens as 1 hundred 5 tens.
- Ask students where you should write the two digits. Lead students to see that:
There are no hundreds left to add, so they both can go under the line.

- Repeat with $373 + 82$.
- Discuss and emphasize the following:
When we add the tens to get 1 hundred 5 tens, there are still hundreds to add, so the 1 hundred we get from adding tens is not the final number of hundreds. We record this hundred by writing the 1 above the hundreds place. Then we can add that hundred to the rest of the hundreds to get the final number of hundreds, which we write below the line.
