Private Tutoring Across the Mediterranean Mark Bray, André E. Mazawi, Ronald G. Sultana, 2013-09-03 Private tutoring supplementary out of school instruction offered at a fee to individuals or groups represents a substantial household expenditure even in systems that claim to have free public education It plays out across alongside and even within some school systems Emerging as a shadow education private tutoring now operates as a system and industry crossing national regional and social class boundaries Private tutoring is provided through different modes of delivery including the internet Policy makers parents teachers trade unions corporations community associations and students are implicated in the private tutoring industry The debates over private tutoring are therefore part of the larger struggles over the ends of education in just and equitable societies The authors in this volume address diverse national settings of private tutoring across the Mediterranean and examine its political economic social and cultural underpinnings They draw on a range of conceptual frameworks and deploy a variety of research methods to problematize the multifaceted relationships between tutoring learning and equity The volume captures a multiplicity of voices and focuses on some of the central challenges facing education in pluralistic societies

Zengeya, 2020-03-10 This open access volume presents a comprehensive account of all aspects of biological invasions in South Africa where research has been conducted over more than three decades and where bold initiatives have been implemented in attempts to control invasions and to reduce their ecological economic and social effects It covers a broad range of themes including history policy development and implementation the status of invasions of animals and plants in terrestrial marine and freshwater environments the development of a robust ecological theory around biological invasions the effectiveness of management interventions and scenarios for the future The South African situation stands out because of the remarkable diversity of the country and the wide range of problems encountered in its varied ecosystems which has resulted in a disproportionate investment into both research and management The South African experience holds many lessons for other parts of the world and this book should be of immense value to researchers students managers and policy makers who deal with biological invasions and ecosystem management and conservation in most other regions
