**China's Uneven and Combined Development** Steven Rolf, 2020-10-15 This book mobilises the theory of uneven and combined development to uncover the geopolitical economic drivers of China s rise The purpose is to explain the formation and trajectory of its economic accumulation system which remains a confounding hybrid of statist and neoliberal forms of capitalism as the outcome of China s geopolitical engagement of the USA during the late stages of the Cold War and its participation in manufacturing global production networks GPNs Fear of geopolitical catastrophe drove China to open its economy while GPNs enabled China to generate substantial export surpluses which could be recycled through state owned banks as cheap credit and subsidies to large vertically integrated and politically controlled state owned enterprises In this way a synergy emerged between the neoliberal and Keynesian Fordist sectors of the economy while the national territorial state retained its form and expanded its functions The book chronicles how this reliance on export surpluses however rendered China extremely vulnerable to external shocks prompting a dramatic monetary and fiscal stimulus response to the crisis of 2008 even while sustaining the illusion of economic decoupling from the global economy Finally it examines the growing role of the state in the current crisis ridden economic model as well as China s current geoeconomic and geopolitical expansionism in areas such as the Belt and Road Initiative and the militarisation of the East and South China Seas

**More** Philip Coggan, 2020-02-13 There are 17 ingredients in a typical tube of toothpaste from titanium dioxide to xanthum gum and that s not counting the tube Everything had to come from

somewhere and someone had to bring it all together The humblest household product reveals a web of enterprise that stretches around the globe More is the story of how we spun that web It begins with the earliest glimmerings of long distance trade obsidian blades that made their way from what is now Turkey to the Iran Iraq border 7 000 years before Christ and ends with the consequences of the Covid 19 pandemic On such a grand scale quirks of historical perspective leap out futures contracts and commercial branding are among the many seemingly modern components of the global economy have existed since ancient times Yet it was only in the 18th century that a cascade of innovations began to drive up prosperity in a lasting way around the world To piece this fascinating saga together Philip Coggan takes the reader inside medieval cottages and hi tech hydroponic farms prehistoric Chinese burial mounds and modern central banks At every step of our journey he finds that it was connections between people that created our wealth Will the same openness continue to serve us in the 21st century
