A formative assessment task from  
*STAAR Biology:  
Assessment Activities for the Texas Readiness Standards*

The purpose of this activity is to reinforce students' understanding that systems in animals constantly interact with one another to keep the animals functioning properly. Students will use an interactive manipulative activity to demonstrate an understanding of the importance of interactions between animal organ systems, and the functions and components of the systems that perform regulation, nutrient absorption, reproduction, and defense. Teachers can use this activity to formatively assess student understanding about systems as a collection of cycles, structures, and processes that interact in animals.
