**Chemistry** John Olmsted, Gregory M. Williams, 1997 Textbook outlining concepts of molecular science      **Mastering Organic Chemistry** Gerald W. Gibson, 1979      *Mastering Chemistry* Jason Chin, Vault Reports (Firm), Job Vault, 1998 The periodic table never looked so good From the properties of matter and mole calculations to the kinetics of reactions and enthalpy change this guide demystifies the complexities of chemistry through easy to follow charts graphs and sample problems      **Chemistry: The Central Science** Theodore L. Brown, H. Eugene LeMay Jr., Bruce E. Bursten, Catherine Murphy, Patrick Woodward, Steven Langford, Darius Sagatys, Adrian George, 2013-10-04 If you think you know the Brown LeMay Bursten Chemistry text think again In response to market request we have created the third Australian edition of the US bestseller Chemistry The Central Science An extensive revision has taken this text to new heights Triple checked for scientific accuracy and consistency this edition is a more seamless and cohesive product yet retains the clarity innovative pedagogy functional problem solving and visuals of the previous version All artwork and images are now consistent in quality across the entire text And with a more traditional and logical organisation of the Organic Chemistry content this comprehensive text is the source of all the information and practice problems students are likely to need for conceptual understanding development of problem solving skills reference and test preparation      **The Emotionally Agile Brain** J.D. Pincus, 2024-12-17 A revolution has been quietly taking place in academic psychology economics neuroscience marketing and business In study after study emotional forces massively outweigh human rationality in determining our actual choices and actions This insight has reshaped both science and industry as its power is harnessed for commercial ends Those of us who are engaged in the nexus of neuroscience psychology and human potential have an obligation to raise awareness of these discoveries and more importantly to use them to actually improve people's lives AgileBrain is based on decades of psychological research conducted by the author and others published in peer reviewed academic journals It begins with the discovery of the first principles of all human motivation Motivation is fundamentally about change These principles can be phrased as two questions Where in your life do you wish to make a change To answer this question we can choose from four life domains the Self the Social the Material and the Spiritual Note that these represent pairs of opposites Self vs Social Material vs Spiritual What kind of change do you wish to make To answer this question we can choose from Aristotle's three levels of existence foundational being experiential doing and aspirational having The answers to these two questions form a Periodic Table of the Elements for human motivations in the form of a three by four matrix Because there are no other possible life domains or levels of aspiration the reader can have confidence that every possible human motivation is accounted for A key takeaway is that all twelve emotional needs are operating and directing us all the time and that a key to a happy actualized life is to pursue fulfillment of needs in a balanced way which avoids serious problems associated with unbalanced need fulfillment A recurring theme in The Emotionally Agile Brain is the value of distinguishing between

authentic need fulfillment and the superficial inauthentic substitutes offered by our consumer culture After analyzing motivational data from hundreds of thousands of individuals and consulting to scores of Fortune 500 clients author J D Pincus explains it this way Everyone has a unique fingerprint of emotional needs at any given moment in time Becoming aware of that motivational state is a profound revelation for most people It cuts right through the noise and distractions of life and frees them to pursue what they really want

**Rediscovering the Spirit of Education After Scientific Management** Jim Neyland, 2010-01-01 Education is being eroded Otherwise put education is more and more being brought under the yoke of a mode of thought that reduces it to something mechanical narrowly characterized by codes predefined outcomes protocols and rules The cause it is argued is the growing dominance of a new fashion in education called scientific management Scientific management has become the new and unquestionable orthodoxy in education As a consequence it has become increasingly difficult to imagine let alone articulate an alternative This book explores the origins and fundamental assumptions of scientific management and suggests how the spirit of education might be rediscovered by turning instead to a more ethical socially interpersonal and full bodied orientation The approach taken avoids the difficulties usually associated with such ethically oriented treatments of education by drawing on recent findings in neurophysiology psychology primate and language studies The book is a Reader and is designed to both supplement and invigorate undergraduate and postgraduate courses in education and to appeal to general readers who have an interest in education
