

Medical Coding ICD-10-PCS

INPATIENT PROCEDURE CODING

Selection of Principal Procedure

The following instructions should be applied in the selection of the principal procedure and classification on the importance of its relation to the principal diagnosis when more than one procedure is performed:

1. Procedure was performed for definitive treatment of both the principal diagnosis and secondary diagnosis.
 - a. Sequence procedure was performed for definitive treatment most related to a principal diagnosis as the principal procedure.
2. Procedure was performed for definitive treatment, and diagnostic procedures were performed for both the principal diagnosis and secondary diagnosis.
 - a. Sequence procedure was performed for definitive treatment most related to a principal diagnosis as the principal procedure.

ICD-10-PCS Coding Conventions

A1 ICD-10-PCS codes are composed of seven characters. Each character is an axis of classification that specifies information about the procedure performed. Within a defined code range, a character specifies the same type of information in that axis of classification.

EX: The fifth axis of classification specifies the approach in sections 0 through 4 and 7 through 9 of the system.

1	2	3	4	5	6	7	8
Series	Body System	Body Quarter	Body Part	Approach	Body	Device	Other

A2 One of 34 possible values can be assigned to each axis of classification in the seven-character code; they are the numbers 0 through 9 and the alphabet (except I and O because they are easily confused with the numbers 1 and 0). The number of unique values used in an axis of classification differs as needed.

EX: Where the fifth axis of classification specifies the approach, seven different approach values are currently used to specify the approach.

A3 The valid values for an axis of classification can be added to as needed.

EX: If a significantly distinct type of device is used in a new procedure, a new device value can be added to the system.

A4 As with words in their context, the meaning of any single value is a combination of its axis of classification and any preceding values on which it may be dependent.

EX: The meaning of a body part value in the Medical and Surgical section is always dependent on the body system value. The body part value 0 in the Central Nervous Body System specifies Brain and the body part value 0 in the Peripheral Nervous Body System specifies Cervical Plexus.

A5 As the system is expanded to become increasingly detailed, over time more values will depend on preceding values for their meaning.

EX: In the Lower Joints body system, the device value 3 in the root operation Insertion specifies Infection Device and the device value 3 in the root operation Replacement specifies Ceramic Synthetic Substitute.

3. A diagnostic procedure was performed for the principal diagnosis, and a procedure was performed for definitive treatment of a secondary diagnosis.
 - a. Sequence diagnostic procedure as the principal procedure, since the procedure most related to the principal diagnosis takes precedence.
4. No procedures are performed that are related to the principal diagnosis; procedures were performed for definitive treatment, and diagnostic procedures were performed for secondary diagnosis.
 - a. Sequence procedure was performed for definitive treatment of a secondary diagnosis as the principal procedure, since there are no procedures (definitive or nondiagnostic treatment) related to the principal diagnosis.

A6 The purpose of the alphabetic index is to locate the appropriate table that contains all information necessary to construct a procedure code. The PCS tables should always be consulted to find the most appropriate valid code.

A7 It is not required to consult the index, first before proceeding to the tables to complete the code. A valid code may be chosen directly from the tables.

A8 All seven characters must be specified to be a valid code. If the documentation is incomplete for coding purposes, the physician should be queried for the necessary information.

A9 Within a PCS table, valid codes include all combinations of choices in characters 4 through 7 contained in the same row of the table. In the example below, QKPY37Z is a valid code, and QKPKX7Z is not a valid code.

Section	0 Medical and Surgical	1 Body System	K Muscles	P Devices: Taking out or off a device from a body part	2
Body Part	Approach	Device			
30 Upper Muscle	0: Open	0: Diagnostic Device			
31 Lower Muscle	1: Percutaneous	1: Autologous Tissue Substitute			
	2: Endoscopic	2: Synthetic Substitute			
32 Upper Muscle	3: Percutaneous Endoscopic	3: Allogeneic Tissue Substitute			
33 Lower Muscle		4: Stimulator Lead			
		5: Other Device			
		6: On/Off Device			
		7: Stimulator Lead			
		X: External			

A10 "And," when used in a code description, means "and/or."

EX: Lower Arm and Wrist Muscle means lower arm and/or wrist muscle.

A11 Many of the terms used to construct PCS codes are defined within the system. It is the coder's responsibility to determine what the documentation in the medical record equates to in the PCS definitions. The physician is not expected to use the terms in the PCS code descriptions, nor is the coder required to query the physician when the correlation between the documentation and the defined PCS terms is clear.

EX: When the physician documents "partial resection," the coder can independently correlate "partial resection" to the root operation Excision without querying the physician for clarification.

on basic coding documentation and rules to ensure correct coding for ICD 9 CM CPT 4 and HCPCS. Progressively difficult coding exercises incorporate newly learned skills as readers advance through the material. The worktext portion of the book and the companion student workbook provide progressively difficult real world exercises that build the necessary skills of identifying the right codes from real world medical charts. Learning objectives, numerous examples, chapter reviews and coding reference tools throughout provide the necessary learning tools to fully master basic and advanced coding concepts.

Professional Review Guide for the CCA Examination, 2004 Edition Patricia J. Schnering, Christine Wagner, Calee Leversee, Toni Cade, Anita Hazelwood, Carol Venable, 2004 This valuable manual contains study tips and a comprehensive resource list. Multiple choice questions to review Biomedical Sciences, Information Technology, Healthcare Data Content, Health Care Delivery Systems, Clinical Classification Systems, ICD 9 CM and CPT coding, Official Coding Guidelines, Billing Reimbursement and Compliance, Commonly Administered Drugs, Lab Values, Official Guidelines for ICD 9 CM, Guidelines for Coding and Reporting. Use the book and the interactive CD ROM to practice interpreting documentation and applying your clinical knowledge in assigning codes to diagnoses and procedure for a variety of patient settings. This program has been approved for 6 continuing education credits for use in fulfilling the continuing education requirements of the American Health Information Management Association AHIMA.

2004 Coding Workbook for the Physician's Office Alice Covell, 2004 This workbook contains coding exercises referencing each section of the CPT 4 and ICD 9 CM coding manuals. Exercises requiring HCPCS Level II codes are also provided. Condition and procedure statements in the exercises reflect the current annual editions of the coding manuals. By completing the exercises, learners will expand their medical vocabulary and increase their coding skills for the physician's office. Also included are the Centers for Medicare and Medicaid Services CMS guidelines for diagnosis coding and reporting by physicians. Learners need current CPT 4, ICD 9 CM and HCPCS coding.

Medical Coding: Icd-10-Cm Speedy Study Guides Speedy Publishing, 2014-07-16 Every known illness, disease and condition has a specific number that goes along with the word describing the person's medical problem. Every physician and their office staff must know medical codes for the sake of billing purposes. If the doctor and office staff does not code a specific illness, condition or disease correctly, the insurance company may not pay for treatment, medication, in-hospital stays, outpatient treatment and a number of surgical and other procedures performed for the patient, making it impossible for the patient to receive the proper treatment. Common illnesses, diseases and conditions listed in a pamphlet would enable the medical student to become familiar and able to memorize the more common medical codes. The bottom line for using proper ICD codes is money reimbursement for the medical community and patient.

Government Reports Announcements & Index, 1988 **Insurance Handbook for the Medical Office** Marilyn Takahashi Fordney, 2002 INSURANCE HANDBOOK FOR THE MEDICAL OFFICE is a key text for medical administrative assisting, medical front office programs or those who wish to become insurance billing specialists, claims assistance professionals or electronic claims processors for
