Esoteric Symbols June Leavitt, 2007-06-15 In this pioneering scholarly work on occult symbols in literature the reader is offered a vivid look into how W B Yeats T S Eliot and Franz Kafka three masters of symbolic expression utilized Tarot cards in their poetry and prose. Focusing on the Tarot's ancient associations with divine knowledge its pictorial representation of both the Jewish and Christian Cabala and the Tarot's more recent pedestrian affiliation with the occult June Leavitt skillfully demonstrates how Yeats Eliot and Kafka align themselves in their uniquely individual ways with the Tarot symbols mapping of reality. Paying close attention to the mystical nuances of the Tarot Ms Leavitt shows how Tarot symbols allow for radically new readings of the texts in which they are situated and play a transformative role in the three writers search for God. This search remained indecisive for Kafka resulted in Eliot's conversion to Anglo Catholicism and went hand in hand with Yeats passion for pagan gods and angels. A Rhetoric of Meanings Gergana Apostolova, 2015-09-04 This book presents an in depth analysis of language's role as the tool and environment for human survival on Earth examining its ability to provide an unlimited space for telling individual stories that bear the knowledge of mankind's self significance. The book is the result of a 20 year long composite study of language phenomenology grounded in the interactions of Bulgarian and English approached in a game like fashion where the play with language units transcends levels of meanings based on significances and explored through the four basic avatars of activated language the learner the teacher the translator and the creator of texts. The book is divided into three sections the first details the motivation for this study and the design of the method of exploration. This is followed by an application of this method to the talkative web in order to find ways of meeting the enormous demand for human content. The final section brings together the colourful practices of activated language movement. This book is not about the philosophy of language per se. It is concerned with the practical field beyond the

philosophy of language where the self identification of the Subject is brought to a higher stage of communicative creativity The rhetoric theory of argumentation is argued throughout the book to be the relevant ground for building a holistic tool of language learning where language acquisition is seen as the capability of the subject to construct worlds in a universe whose leading structure involves the rhetoric criteria of ethos pathos and logos on the one hand and the self identifying choice of meanings to situations of complex nature on the other As such the book is primarily concerned with linguistics rhetoric semiotics of culture ethics and language learning viewed through a philosophical preoccupation with humanity The Picture and the Text Robert MacDougall,1914 *Usability Evaluation and Interface Design* Michael J. Fist,2012-12-06 This is not a dictionary and nor is it an encyclopedia It is a reference and compendium of useful information about the converging worlds of computers communications telecommunications and broadcasting You could refer to it as a guide for the Information Super Highway but this would be pretentious It aims to cover most of the more important terms and concepts in the developing discipline of Informatics which in my definition includes the major converging technologies and the associated social and cultural issues Unlike a dictionary this handbook makes no attempt to be prescriptive in its definitions Many of the words we use today in computing and communications only vaguely reflect their originations And with such rapid change older terms are often taken twisted inverted and mangled to the point where any attempt by me to lay down laws of meaning would be meaningless The information here is descriptive I am concerned with usage only This book therefore contains keywords and explanations which have been culled from the current literature from technical magazines newspapers the Internet forums etc This is the living language as it is being used today not a historical artifact of 1950s computer science **Tobacco** ,1924 **Text as Picture** Hans Lund,1992 This work is arranged in two sections the first presenting the international debate concerning the theoretical prerequisites for the study of the relation of literary text to pictorial art The second explicates the author s concept of iconic projection which is the human disposition to perceive reality as if it were a picture **Editor & Publisher** ,1926 The fourth estate **The Introduction of Characters by Name in Greek and Roman Comedy ...** David Martin Key,1923 *Signs of the Times, and Doctrinal Advocate and Monitor* ,1903
