"Fender rocks a high note"

(The brand "that started it all" is still the buzz today at its guitar factory and visitors center in Southern California)

It all began way back in 1938.

Leo Fender, the founder of Fender Musical Instruments Corporation (FMIC) - or simply Fender as it is more commonly known - was then an unemployed accountant with a self-taught know-how for electronics. So, on borrowed money and big dreams, he and his wife Esther returned to Fullerton, California, from San Luis Obispo to open a radio repair shop, "Fender Radio Service." And what started as a struggling regional upstart in the heart of Southern California flourished into the world's leading guitar manufacturer - one whose name has become synonymous with all things rock and roll. Leo expanded his business, founded Fender Electric Instrument Manufacturing Company in 1946 (which later became the name it carries today), and the rest is music history (About Fender).

So, what is it about this once modest music-making manufacturer that still drives the instrument industry today? Why has it so dominated the guitar world since its inception? And how does it continue to command the loyalty of the world's biggest musical performers? The answers can be found, in part, by visiting FMIC's Visitor Center and Guitar Factory in Corona, California - Fender's only manufacturing facility in the United States for its electric products. This author recently took a trip there to see if the hype was real, much to the delight of two teenage sons who clamored - even begged - for the opportunity to join the journey (and a wife just as excited for the chance to spend time with her guys, well, being guys).

Our road trip took us just under two hours from our home in the high desert to Fender's facility in Corona. In the time it took to get there, our vehicle was filled with excited conversation about what to expect upon arrival. Spontaneous competition erupted as we took turns naming previous and current musical artists touting the Fender brand: Keith Richards, Stevie Ray Vaughan, The Beach Boys, Rick Springfield, Jimi Hendrix, and so on. Of course, no conversation about Fender is conducted without discussing the images it invokes, and ours was no exception; we gushed about the big-band and rock atmospheres created by Fender's product line (much to the chagrin of my wife's conservative sensibilities), and babbled in nearly incoherent fashion about our fantasies of headlining for sold-out crowds in a packed arena somewhere. Just as our fervor reached a fever pitch, we had arrived.

The Fender Visitors Center and Factory is located in a non-descript neighborhood of industrial offices and warehouses typical of manufacturing organizations: a series of rail lines border the rear of the facility, and the factory is situated in the immediate vicinity of major highway thoroughfares. It is a two-building complex separated by a mode

Alkin,2004-02-24 Concern for evaluation theoretical prescriptions emerged about 40 years ago giving it a history that is both recent enough to be part of the living experience of many of today s theorists and old enough to afford an opportunity

for an analysis of how the field has evolved over time This book examines current evaluation theories and traces their evolution with the point of view that theories build upon theories and therefore evaluation theories are related to each other Initially all evaluation was derived from social science research methodology and accountability concerns The way in which these evaluation roots grew to form a tree helps to provide a better understanding of evaluation theory Thus the book uses an evaluation theory tree as its central metaphor The authors posit that evaluation theories can be classified by the extent to which they focus on methods uses or valuing these three approaches form the major limbs of the tree In addition to the authors overview which analyzes the evaluation theory tree and connections among theories the book contains essays by most of the leading evaluation theorists In these pieces the evaluators comment on their own development and give their views of their placement upon the tree
