## Student Exploration: Unit Conversions

**Vocabulary:** base unit, cancel, conversion factor, dimensional analysis, metric system, prefix, scientific notation

**Prior Knowledge Questions (Do these BEFORE using the Gizmo.)**

Sara lives in Toronto, Canada, while her cousin Michael lives in Detroit, Michigan. They like to compare how fast they are growing up.

1. Sara tells Michael she is 160 centimeters tall, while Michael says he is 60 inches tall. If there are 2.54 centimeters in an inch, who is taller? \_\_\_\_\_
2. Michael tells Sara he weighs 104 pounds. Sara says she is 44 kilograms. If there are 2.2 pounds in a kilogram, who is heavier? \_\_\_\_\_

**Gizmo Warm-up**

As you could see from the questions above, there are different ways to measure the same quantity. Every measurement includes both a number and a unit. There are many, many different units you can use to measure the same attribute, such as height, weight, or volume. The *Unit Conversions Gizmo™* shows you how you can convert from one unit to another in order to compare measurements.

1. To begin, check that this question is shown: *The tallest building in the world, the Burj Khalifa in Dubai, is 0.828 kilometers high. What is the building's height in centimeters?* (If this is not the question you see, click **Next** until it appears.)
  - A. What unit is given in the question? \_\_\_\_\_
  - B. What unit is asked for? \_\_\_\_\_
2. Look for the **Unit Conversion Tile** that has the unit "meter" on top and "kilometer" on the bottom. This tile shows a **conversion factor**, or a ratio that compares two equivalent values.
  - A. According to this tile, how many meters are in a kilometer? \_\_\_\_\_
  - B. Look at the tile next to it. How many centimeters are in a meter? \_\_\_\_\_

Bolker,Maura B. Mast,2016-05-04 Common Sense Mathematics is a text for a one semester college level course in quantitative literacy The text emphasizes common sense and common knowledge in approaching real problems through popular news items and finding useful mathematical tools and frames with which to address those questions We asked ourselves what we hoped our students would remember about this course in ten year s time From that ten year perspective thoughts about syllabus what topics should we cover seemed much too narrow What matters more is our wish to change the way our students minds work the way they approach a problem or more generally the way they approach the world Most people skip the numbers in newspapers magazines on the web and more importantly even in financial information We hope that in ten years our students will follow the news confident in their ability to make sense of the numbers they find there and in their daily lives Most quantitative reasoning texts are arranged by mathematical topics to be mastered Since the mathematics is only a part of what we hope students learn we ve chosen another strategy We look at real life stories that can be best understood with careful reading and a little mathematics      **Learning Mathematics in Elementary and Middle Schools** W. **linear feedback shift register wikipedia** - Oct 09 2023

web in computing a linear feedback shift register lfsr is a shift register whose input bit is a linear function of its previous state the most commonly used linear function of single bits is exclusive or xor thus an lfsr is most often a shift register whose input bit is driven by the xor of some bits of the overall shift register value
