Handbook of Second and Foreign Language Writing Rosa M. Manchón,Paul Kei Matsuda,2016-09-12 The Handbook of Second and Foreign Language Writing is an authoritative reference compendium of the theory and research on second and foreign language writing that can be of value to researchers professionals and graduate students It is intended both as a retrospective critical reflection that can situate research on L2 writing in its historical context and provide a state of the art view of past achievements and as a prospective critical analysis of what lies ahead in terms of theory research and applications Accordingly the Handbook aims to provide i foundational information on the emergence and subsequent evolution of the field ii state of the art surveys of available theoretical and research basic and applied insights iii overviews of research methods in L2 writing research iv critical reflections on future developments and iv explorations of existing and emerging disciplinary interfaces with other fields of inquiry Measurement and Assessment in Education Cecil R. Reynolds,Ronald B. Livingston,Victor L. Willson,2006 This text employs a somewhat traditional approach to the study of educational tests and measurement so that teachers will understand essential psychometric concepts and be able to apply them in the classroom The principles that guide the development of this text are 1 What essential knowledge and skills do classroom teachers need to conduct student assessments in a professional manner and 2 What does the research on educational assessment tell us This focus has resulted in a uniquely approachable but technically accurate presentation of the material While providing a slightly more technical presentation of the material than more basic texts this text is both approachable and comprehensive The text includes a gentle introduction to the basic mathematics of measurement and expands traditional coverage to include a thorough discussion of performance and portfolio assessments a complete presentation of assessment accommodations for students with disabilities and a practical discussion of professional best practices in educational measurement **Handbook of Writing Research** Charles A. MacArthur,Steve Graham,Jill Fitzgerald,2008-01-14 Presents a collection of essays discussing the theories and models of writing research **EACL 2003** Association for Computational Linguistics. European Chapter. Conference,2003 **THE Journal** ,2004 *Educational Measurement* Robert L. Brennan,2006-08-30 The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions As such the fourth edition documents

progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners This new edition of Educational Measurement is edited by Robert Brennan and jointly sponsored by ACE and the National Council on Measurement in Education It provides in depth treatments of important measurement topics and the chapter authors are acknowledged experts in their respective fields NATIONAL COUNCIL ON MEASUREMENT IN EDUCATION is an organization incorporated for scientific educational literary and charitable purposes i e advancing of the science of measurement instruments and procedures improving applications of measurement and disseminating knowledge about measurement theory techniques and instrumentation **Automated Essay Scoring** Semire Dikli,2006 The impacts of computers on writing have been widely studied for three decades Even basic computers functions i e word processing have been of great assistance to writers in modifying their essays The research on Automated Essay Scoring AES has revealed that computers have the capacity to function as a more effective cognitive tool Attali 2004 AES is defined as the computer technology that evaluates and scores the written prose Shermis Shermis Shermis Raymat Barrera 2003 Revision and feedback are essential aspects of the writing process Students need to receive feedback in order to increase their writing quality However responding to student papers can be a burden for teachers Particularly if they have large number of students and if they assign frequent writing assignments providing individual feedback to student essays might be quite time consuming AES systems can be very useful because they can provide the student with a score as well as feedback within seconds Page 2003 Four types of AES systems which are widely used by testing companies universities and public schools Project Essay Grader PEG Intelligent Essay Assessor IEA E rater and IntelliMetric AES is a developing technology Many AES systems are used to overcome time cost and generalizability issues in writing assessment The accuracy and reliability of these systems have been proven to be high The search for excellence in machine scoring of essays is continuing and numerous studies are being conducted to improve the effectiveness of the AES systems *Machine Scoring of Student Essays* Patricia Freitag Ericsson,Richard Haswell,2006-03-15 The current trend toward machine scoring of student work Ericsson and Haswell argue has created an emerging issue with implications for higher education across the disciplines but with particular importance for those in English departments and in administration The academic community has been silent on the issue some would say excluded from it while the commercial entities who develop essay scoring software have been very active Machine Scoring of Student Essays is the first volume to seriously consider the educational mechanisms and consequences of this trend and it offers important discussions from some of the leading scholars in writing assessment Reading and evaluating student writing is a time consuming process yet it is a vital part of both student placement and coursework at post secondary institutions In recent years commercial computer evaluation programs have been developed to score student essays in both of these contexts Two year colleges have been especially drawn to these programs but four year institutions are moving to them as well because of the cost savings they promise Unfortunately to a large extent the

programs have been written and institutions are installing them without attention to their instructional validity or adequacy Since the education software companies are moving so rapidly into what they perceive as a promising new market a wider discussion of machine scoring is vital if scholars hope to influence development and or implementation of the programs being created What is needed then is a critical resource to help teachers and administrators evaluate programs they might be considering and to more fully envision the instructional consequences of adopting them And this is the resource that Ericsson and Haswell are providing here   **Educational Assessment** Thomas P. Hogan,2007 Following a practical approach this book focuses on educational assessment as it is practiced today in the actual world of classrooms school systems state departments and national organizations It first covers the basic concepts applicable to all types of assessment statistical concepts reliability validity and interpretive frameworks Then it explores the preparation of teacher made tests standardized tests and other important areas such as grading legal issues and evaluating one s own teaching   **Business 2.0** ,2000-11
