Routledge International Handbook of Failure Adriana Mica, Mikołaj Pawlak, Anna Horolets, Paweł Kubicki, 2023-01-30. This Handbook examines the study of failure in social sciences, its manifestations in the contemporary world and the modalities of dealing with it both in theory and in practice. It draws together a comprehensive approach to failing and invisible forms of cancelling out and denial of future perspectives. Underlining critical mechanisms for challenging and reimagining norms of success in contemporary society, it allows readers to understand how contemporary regimes of failure are being formed and institutionalized in relation to policy and economic models such as neo-liberalism. While capturing the diversity of approaches in framing failure, it assesses the conflations and shifts which have occurred in the study of failure over time. Intended for scholars who research processes of inequality and invisibility, this Handbook aims to formulate a critical manifesto and activism agenda for contemporary society. Presenting an integrated view about failure, the Handbook will be an essential reading for students in sociology, social theory, anthropology, international relations and development research, organization theory, public policy management studies, queer theory, disability studies, sports and performance research.

Self-Medication and Society

Sylvie Fainzang,2016-11-03 The question of recourse to self medication arises at the intersection of two partly antagonistic discourses that of the public authorities who advocate the practice primarily for economic reasons and that of health professionals who condemn it for fear that it may pose a danger to health and dispossess the profession of expertise This book examines the reality of self medication in context and investigates the social treatment of the notion of autonomy ever present in the discourses promoting this practice Drawing on fieldwork conducted in France the author examines the material cognitive symbolic and social dimensions of the recourse to self medication considering the motivations and practices of the subjects and what these reveal about their relationship with the medical institution while addressing the question of open access to medicines a subject of heated debate between the actors concerned on themes such as competence knowledge and responsibility A rigorous analysis of the strategies adopted by individuals to manage the risks of medicines and increase their efficacy Self Medication and Society will appeal to sociologists and anthropologists with interests in health illness the body and medicine
