## **Targeting in International Law** Amin

Parsa, 2023-12-05 This book is about how distinctions are drawn between civilians and combatants in modern warfare and how the legal principle of distinction depends on the technical means through which combatants make themselves visibly distinguishable from civilians The author demonstrates that technologies of visualisation have always been part of the operation of the principle of distinction arguing that the military uniform sustained the legal categories of civilian and

combatant and actively set the boundaries of permissible and prohibited targeting and so legal and illegal killing Drawing upon insights from the theory of legal materiality visual studies critical fashion studies and a dozen of military manuals he shows that far from being passive objects of regulation these technologies help to draw the boundaries of the legitimate target With its attention to the co productive relationship between law technologies of visualisation and legitimization of violence this book will be relevant to a large community of researchers in international law international relations critical military studies contemporary counterinsurgency operations and the sociology of law Labor Relations Reference Manual

Nakao,Hidenori Harada,2022-02-28 This open access book deals with global sanitation where SDG 6 2 sets a target of enabling access to sanitation services for all but has not yet been achieved in low and middle income countries The transition from the United Nations MDGs to the SDGs requires more consideration based on the socio cultural aspects of global sanitation In other words equitable sanitation for those in vulnerable situations could be based on socio cultural contexts Sanitation is a system that comprises not only a latrine but also the works for the treatment and disposal of human waste Sanitation systems do not function by themselves but have significance only through social management The process of decision making also largely depends on socio cultural conditions and the importance of sanitation needs to be socially acknowledged The health benefits of sanitation improvement among the significant contributions of sanitation also need to

be considered in the socio cultural milieu Further the social culture itself is affected and potentially even created by sanitation In this context more progress on the improvement of sanitation requires a more holistic approach across disciplines In this book we present the concept of the Sanitation Triangle which considers the interconnections of health materials and socio culture in sanitation as a holistic approach and the case studies based on the Sanitation Triangle by diverse disciplines such as Cultural Anthropology Development Studies Health Sciences Engineering and Science Communication By the deep theoretical examinations and inter dialogues between the different disciplines this book explores the potentialities of inter disciplinary studies on global sanitation
