**The Audit Checklist**, 1992 As the old saying goes, If you have no objective any road will take you there. So it is with the audit checklist. The checklist is the primary tool for providing order to Quality Assurance audit activities. With a well planned and well defined checklist, success is achievable. Without a checklist, the auditor has a disjointed, disorganized activity and no place to document his or her failed efforts. A number of formal quality programs which include audits as one of their program

elements require the audit to be performed using a checklist or procedures to document what the auditor reviewed and what he or she found. It is the intent of this paper to provide the reader with some insight as to the value of the checklist, the varieties of checklists that can be constructed, the pitfalls of improper application and the success that can be achieved when the checklist has been properly researched, developed and deployed. **Development of an Internal Audit Checklist for Simultaneous Audit of Integrated Management Systems** Denis Robert Bourcier, 2007

Over the last 5 years, there has been a growing initiative within the international quality profession to integrate internal management systems conforming to published international standards for three management systems: a quality, b environmental and c health and safety. Even though a significant amount of commonality exists between the four standards covered in this project, two quality, one environmental and one occupational health and safety standard, many organizations have found that conducting sequential audits against various standards has been a challenge as separate audit documentation would typically be required. Although the topic of multi standard conformance has been addressed in the literature with regard to internal audits, a simple audit tool embodying the key elements of the four standards has yet to be

described This project presents a single multi standard audit criteria document that any aerospace organization might use to simultaneously evaluate conformance to the four standards during a single audit **Understanding and Conducting**
