Leadership Lessons: 10 Keys to Success in Life and Business Jim Swartz, Julie K. Thorpe, 2008-01-01 Achievers the masters innovators and great ones do not owe their success to luck birth or environment Rather great achievers throughout history from Michelangelo to Einstein Madame Curie to Bill Gates Colonel Sanders to General Eisenhower all have characteristics that the authors have distilled into actions for extraordinary success in any field In the process some old notions are put to rest including the saw that innovators must be risk takers in fact they not and that great ideas just happen This book ranges from the importance of preparing for success acquiring expertise to endurance against obstacles and recognizing and then seizing opportunities None of it is easy they say but the rewards can be substantial This fascinating book will be especially helpful for senior executives ambitious managers and entrepreneurs many will find the clarity of its prose and sometimes surprising relevance of the examples and keys inspirational Literature and the Metaphoric Universe in the Mind Nicolae Babuts, 2015-09-30 Nicolae Babuts believes that the study of metaphoric thought and literature can be enriched by the application of recent discoveries from neuroscientific experiments He maintains that metaphors are neither linguistic formations nor conceptual formations but instead the product of association of images and language They are a matter of vision Memory is an essential component in the creation of meaning and is the way the mind receives messages from the outside world In this process of transferring data from the outside world the mind's overriding tendency is to integrate and interpret Thus incoming messages are recognized and given meaning whether they are in harmony with the inner world of the mind or in conflict with it Babuts argues that the literature we read is related to our perception of reality And reality has two identities the physical identity of the outside world and its symbolic identity within memory The symbolic

identity of the outside world is represented internally by the metaphoric universe in the mind [Consciousness](#) Josh Weisberg, David Rosenthal, 2022-07-06 CONSCIOUSNESS Consciousness is a thought provoking collection of classic and contemporary philosophical literature on consciousness bringing together influential scholarship by seminal thinkers and the work of emerging voices who reflect the diversity of the field Editors Josh Weisberg and David Rosenthal have selected discussions that animate modern debates and connect consciousness to broader philosophical topics Providing an expansive view of the philosophical landscape of consciousness studies this carefully calibrated reader features classic work from the past four decades by seminal thinkers such as Thomas Nagel David Lewis Ned Block Gilbert Harman and Daniel Dennett as well as important recent work from David Chalmers Fiona Macperson Joseph Levine Kathleen Akins and other contemporary philosophers Divided into five parts Consciousness explores the nature of consciousness consciousness and knowledge qualitative consciousness and theories of consciousness A final section on agency and physicalism includes work by Galen Strawson and a previously unpublished article by Myrto Mylopoulos Philosophically challenging yet accessible to students Consciousness is an ideal reader for many undergraduate and graduate courses on consciousness or philosophy of mind as well as a useful supplementary text for general classes in philosophy and a valuable reference text for philosophers of mind cognitive scientists and psychologists
