*The Green Book*, 2004      *Integral Green Zimbabwe* Elizabeth Mamukwa, Ronnie Lessem, Alexander Schieffer, 2016-05-23

*Integral Green Zimbabwe An African Phoenix Rising* by Ronnie Lessem Alexander Schieffer and Liz Mamukwa is the first book in the Integral Green Society and Economy series a series which has three overarching aims The first aim is to link together two major movements of our time one philosophical the other practical The philosophical movement is towards what many today are calling an integral age while the practical is the green movement duly aligned with that of sustainable development The second is to blend together elements of nature and community culture and spirituality science and technology politics and economics thus serving to bring about an integral green vision albeit with a focus on business and economics As such the authors transcend the limitations to sustainable development and environmental economics which are overly ecological if not also technological in orientation and exclude social and cultural elements Thirdly this particular volume focuses specifically on Zimbabwe as well as Southern Africa drawing on the particular issues and capacities that this country and region represents The emphasis on Zimbabwe and Southern Africa transpired not only because two of the editors Lessem and Mamukwa are Zimbabwean in origin but because Zimbabwe is today like a phoenix rising from the ashes and has the opportunity to recreate itself anew

Reimagining Justice, Human Rights and Leadership in Africa Everisto Benyera, 2019-08-08 Failed attempts in Africa to develop democratise and instil virtues of a just state and society which promote benevolent leadership and advance political and economic rights and freedoms call for a new imagination By exploring a wide range of issues concerning justice human rights and leadership this book makes two major contributions to the extant literature in each of these areas Firstly as a project in decoloniality it constitutes an epistemic break from mainstream logics and approaches to understanding state society and development in Africa presenting an approach that is filtered through a Euro American lens that reifies the hegemony of a particular spatio temporality In other words it emphasises the importance of situatedness by thinking from rather than about or with Africa And secondly it addresses a fundamental shortcoming in decolonial thought which is often criticised for rejecting western paradigms of thought without providing viable alternatives The issues covered include state failure in Africa the geopolitics of US and NATO military interventions on the continent individual states responses to international law indigenous moral political leadership authentic inclusion of marginalised voices in development practice an endogenous approach to environmental ethics and a spiritualist reflection on the need for Africa to chart her own course to political social and economic redemption By searching for alternative paths to justice human rights and leadership this book represents an effort to actualise the core vision of the African Renaissance to find African solutions for African problems

 Million,Ignacio Castillo Ulloa,2025-08-06 The book critically addresses the role of spatial methods in a transdisciplinary  
 research practice agenda regarding the promotion of urban sustainability throughout the globe with the aid of eight different  
 transdisciplinary approaches primarily based throughout the Global South and jointly penned by academics and practitioners  
 While the range of methodological discussions regarding research and practice collaborations between scientific researchers  
 and local practitioners based in NGOs private firms or local government agencies as well as independent policy makers or  
 artists for the purpose of urban sustainability has been thriving vastly over the last years little attention has been paid to  
 spatial methods in particular This is not to mention their transdisciplinary use in urban contexts of the Global South  
 Resorting on empirical settings as diverse as Pretoria South Africa Porto Alegre and S o Paulo Brazil Kolkata India Bangkok  
 Thailand and Tshwane South Africa during the last four partially Covid 19 pandemic years as well as Tangerang Indonesia  
 from 2001 to 2021 and San Jos Costa Rica between 2004 and 2007 the book sheds light on the following twofold question  
 Which possibilities and limitations can spatial methods respectively unravel and encounter for transdisciplinary research and  
 practice in view of the SDG11 targets By pursuing very diversified research and practice paths with the aid of specific  
 combinations of spatial methods each of the eight chapters makes evident the book s central claim the deployment of spatial  
 methods in transdisciplinary projects for SDG11 has a transformative role While some chapters especially highlight the  
 personal dimension of the changes brought about to academics by the spatial methodological transdisciplinary experiments  
 others emphasize the academic reach of the spatial methodological experience accomplished in and through
