

# Groundwater & Soils Pollution Lab

**Materials:** food coloring; a slice of white bread; a plastic/aluminum tray; paper towel; water; eye dropper

**Directions:** use this sheet (and your notes) to complete this lab. Each person is responsible for answering an equal share of the questions (e.g. if you have 4 people in your group, the first person should answer #1, #5, #9, etc.). Those not writing should work together to create the answer for the writer to write. Only one sheet per group is needed.  
+ = exceed expectations (full sentences, legible handwriting, etc.). ✓ = met but did not exceed expectations.

## Procedure:

Step 1: Hold your slice of bread vertically in the tray.

Step 2: Add a drop of food coloring to the top of the bread (make sure it drops on the crust and not on the bread).

Step 3: Drop 2 ml of water onto the bread using an eyedropper.

Step 4: Record your observations after 5 minutes. While waiting, answer any questions below that you are able to.

## Observations:

1. What happened to the bread after you added the drops of water? Explain:

After we added few drops of water on top of the bread (the earth crust) together with the food color, the upper surface of the bread just below the bread crust (earth crust) gets dumped.

2. Draw what happened below:

*Before the food coloring*

*After the food coloring*

*Immediately after the water*

*After 5 minutes*
