The Dyscalculia Solution Jane Emerson, Patricia Babbie, 2014-12-08 This new book by authors Jane Emerson and Patricia Babbie follows on from their award winning book the Dyscalculia Assessment Once careful assessment has identified the particular numeracy difficulties your pupils may have the Dyscalculia Solution provides a practical teaching guide for addressing and solving those difficulties The Dyscalculia Solution includes step by step instructions on how to teach pupils to use whole numbers by talking and reasoning about them and communicating their thinking in a verbal diagrammatic and written form The book includes scripts to emphasise the importance of using the correct language to develop numerical thinking as well as teaching objectives activities and games which are important for fostering a positive attitude to numeracy Each new concept builds on previous understanding so that new facts are derived by reasoning from known facts The Dyscalculia Solution is ideal for use with primary school children but can easily be adapted for older students and is invaluable for SENCOs TAs educational psychologists and mainstream teachers keen to support students with numeracy difficulties in their class Accompanying materials in both print and electronic formats to support busy teachers by providing lesson plans and worksheets are available with this book

Dyslexia, Dyspraxia and Mathematics Dorian Yeo, 2008-04-30 Written by a teacher with many years experience of teaching mathematics to primary school dyslexic and dyspraxic children with a wide range of abilities this book is designed to be a practical teaching guide It offers detailed guidance and specific teaching suggestions to all specialist teachers support teachers classroom teachers and parents who either directly teach mathematics to dyslexic and dyspraxic children or who support the mathematics teaching programmes of dyslexic or dyspraxic children Although the book has grown out of teaching experience it is also informed by widely acknowledged contemporary and international research which explores the cognitive aspects of learning mathematics and tries to understand why it is that some children fail to learn mathematics Many of the teaching principles described in the text have specific and quite far reaching implications The theoretical arguments should therefore also be of interest to special needs coordinators heads of maths departments head teachers or other professionals who are responsible for designing or modifying the maths learning programmes of children with special learning and maths difficulties In more general terms the book

hopes to contribute to the broad discussion of the cognitive features and educational needs of dyslexic and dyspraxic children
