Relying on open source information it examines the efficacy of the safety security arrangement in and around India's nuclear installations keeping in mind the international best practices. As India has embarked on a civil nuclear expansion programme the public concern for safety and security of nuclear facilities and material is obvious especially in the backdrop of terrorist incidents and the Fukushima disaster. This poses a serious challenge to garnering greater domestic support for new nuclear projects with international collaborations. Here an attempt is made to examine the issues involving social acceptance of nuclear energy safe disposal of nuclear waste regulatory practices and likely challenges ahead for India to propose a new nuclear safety security paradigm by looking beyond the usual defence by design or defence in depth practice.
