

# Arizona Anti-Abortion Center Funding

When someone is making a decision about continuing or ending a pregnancy, they should be able to get accurate information about all their options so they can decide what is best for themselves. **Anti-abortion centers (AACs) do not support pregnant people and families. Instead, they serve as a barrier to parental support and legitimate health care, including abortion access.**

**Arizona** is one of many states that funds AACs with taxpayer dollars. Equity Forward estimates that since 1995, states have allocated a combined total of **more than \$1.13 billion in tax dollars to AACs** through state-run Alternative to Abortion programs or via other funding streams. In several places, millions of federal Temporary Assistance for Needy Families (TANF) dollars, which are meant to support families working to make ends meet, instead get diverted to AACs.

**Period of Funding:** **FY 2022 - FY 2023**

**Current Funding:** **\$0**

**Estimated Funding Over Time:** **\$4,500,000**

## Funding Propaganda:

**Anti-abortion centers often spend more on overhead and propaganda than they do on services.**

Arizona's Alternatives to Abortion (A2A) program **claims** to support people and families, but a review of Arizona Youth Partnership's contract with the AZ Department of Health Services tells a different story.

- Only **1.13%** went toward **direct support** as defined in the program's budget, while...
- **41.66%** went toward **personnel** and,
- **13.37%** went toward **marketing** and other operating costs such as Google ads that target people seeking abortion care as well as local news visibility campaigns.

## Supporting Deceptive Practices:

**Anti-abortion centers exist in order to delay or deter pregnant people from getting abortion care.**

Anti-abortion centers outnumber in-person abortion clinics 45 to 9 in Arizona, but AACs are not a replacement for health care services, nor are they able to support pregnant people or parents.

## Anti-Abortion Centers Do Not Address The Maternal Care Crisis:

**Anti-abortion centers don't contribute to ameliorating health inequities.**

States are investing in anti-abortion propaganda when money could be going to programs that address the multiple crises in our communities.

Nationwide, Arizona has the 11th highest maternal mortality rate and the 31st highest infant mortality rate.

**Of all Arizona counties, 13% are maternity care deserts.**

## Take Action — End Tax Dollars From Flowing To Anti-Abortion Centers

Funding AACs siphons money away from low-income individuals and those in need of quality health care, and instead places it in the hands of organizations that spread biased, false, and harmful information — and have been left unchecked far too long.

### Reallocation:

**Tax dollars should go to programs that provide the support parents and pregnant people need.**

Instead of funneling money to programs that spend more on propaganda than services, states can fund people getting health care, accurate information, and access to all of their options, including abortion, adoption, and meaningful support for parents to raise children once they are born.

### Regulation:

**States must engage in greater scrutiny, investigation, and regulation of AACs**, especially those that rely on taxpayer dollars. AACs should not be allowed to engage in unscrupulous tactics and should be required to be transparent about their use of funds and operations.
